LOAN INFORMATION PANEL

GET DATA FAST

Wouldn't it be great to have a custom header to show you critical data without having to search from form to form?

Ignite's Loan Information Panel (LIP) provides users with quicker access to key data points within the loan without having to navigate to multiple screens. The best part? It's completely configurable by persona. Each Persona can have a LIP dedicated to the fields that pertain to them.

The LIP displays key data points to the user directly below the standard Encompass Header by using an expand/collapse button that opens to display various data points.

SAMPLE DATA POINTS INCLUDE:

- Loan Purpose
- Loan Type
- Loan Program
- FICO
- Loan Term Occupancy
- Appraised Value
- AUS
- Lock Price
- Discounts
- Credits
