

SERVICES AUTOMATION

INTEGRATE. AUTOMATE.

The Ignite Services Automation eliminates the manual process of ordering loan related services and automatically processes the service order for the end user based on loan criteria and a proprietary rules engine. Ordering loan related services can be configured to your workflow and the automation will handle the rest.

The Ignite Services Automation is like having your own loan assistant working for you on everyday loan tasks so you can focus on more pressing areas of the loan.

BENEFITS OF SERVICES AUTOMATION:

- Ensures Services are ordered in a timely manner
- Users are notified when orders are complete and returned to the loan file
- Enhances workflow for end users and allows service orders to be managed more effectively
- Lets users focus on key areas of the loan while service orders are placed on their behalf
- Eliminates unnecessary clicks associated with order placement and time-consuming follow-up required to check status on service orders
